AMSEC

Proposed Management Structure for:

- Battle Command
- Simulation
- Experimentation

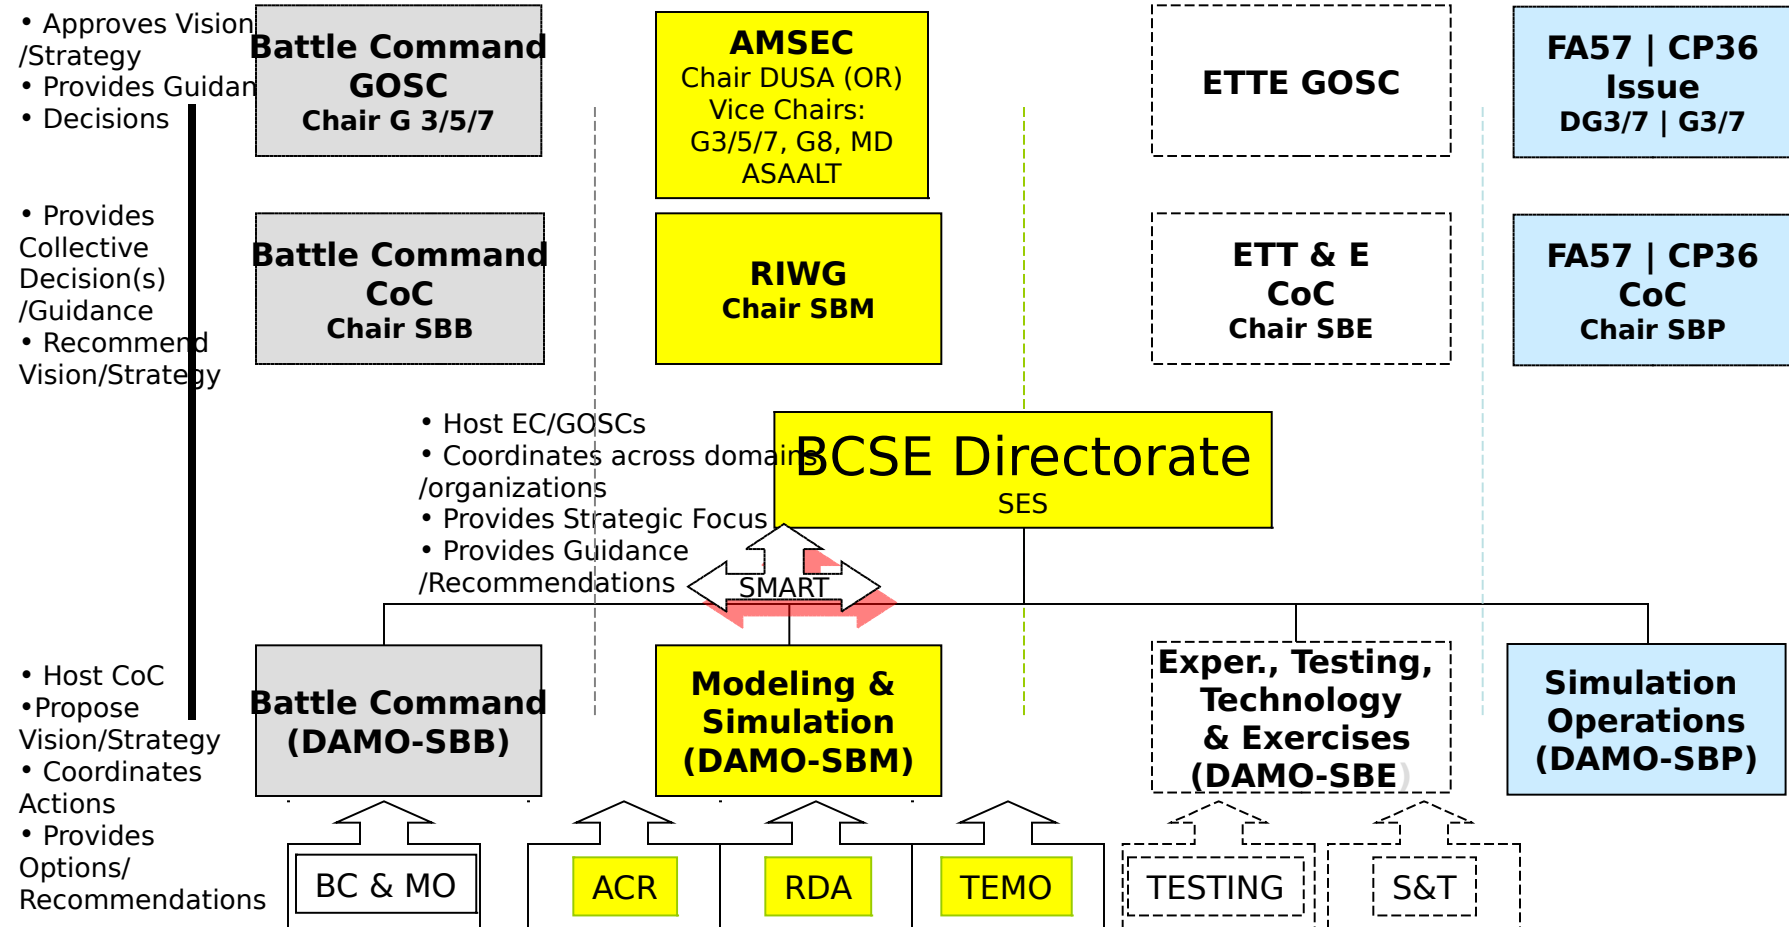

COL George Stone
11 July 2005

ISSUE

- Purpose: Assess/Revise the current M&S Management Structure
- The G-3/5/7 Reorganization had a direct impact on the Modeling and Simulation (M&S) management structure, through the addition, deletion, and consolidation of divisions within the organizations.
 - In June 2004, the Army Model and Simulation Office was incorporated as a division within the Battle Command, Simulation and Experimentation Directorate.
 - BCSE now has Battle Command, Simulation, and Experimentation oversight for Dept of the Army with specific roles outlined in General Order #3
- Currently, there is no formal structure to align the synergies afforded by Battle Command, Simulation and Experimentation
 - All management structures are within the G-3/5/7 DAMO SB.
 - Realign AMSEC structure with the Battle Command and Experimentation management structure.
 - For more visibility of Embedded Systems/Simulations, we recommend a fourth area called Systems TADSS with oversight and leadership under the G-8.

Proposed BCSE Management Structure
